## Notes:

Developed based on the 2012 ACS PUMS data, which uses 2011 income, adjusted to remove SSI and public assistance.

Uninsured under 138% is inclusive of those below 105% as well.

Uninsured counts include college students and incarcerated individuals.

This exhibit illustrates uninsured estimates. Please note that not all of the uninsured will enroll in a HIP Expansion.

In addition to the uninsured, Milliman anticipates that many of those with individual insurance or employer insurance, who are otherwise eligible, will switch to HIP 2.0. This will especially apply to those with high ESI premiums and cost sharing.
