## CASE STUDY

# School-Based Medicaid Billing

## Challenge

The school district came to ClaimAid in need of additional resources to bolster their Special Education programs and to retain and grow their team of therapists. Tight district budgets meant that individual staff members had to take on the expenses of certification themselves. The overburdened district knew that Medicaid reimbursements were available but lacked the expertise or bandwidth to tap into it.

## Solution

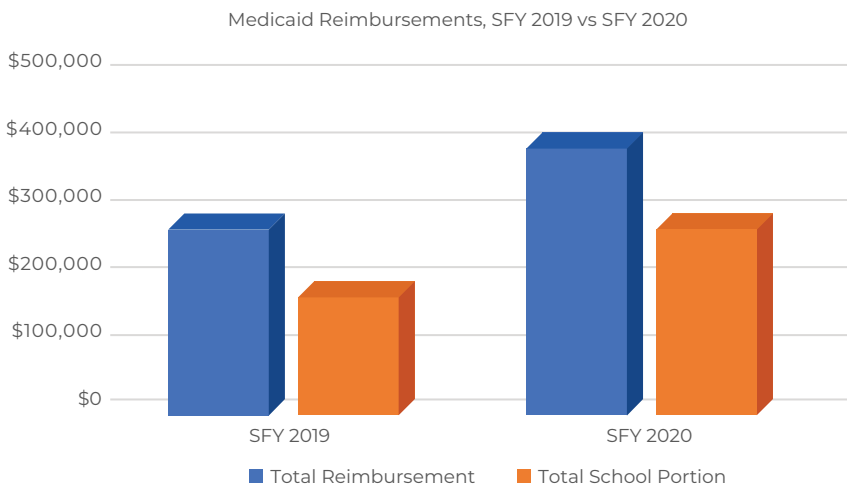

ClaimAid's reimbursement experts partnered with the district to create for them a personalized, easy-to-use Medicaid Billing solution. ClaimAid's School-Based Medicaid Billing program allowed the district to focus on their students instead of administration and reviewing reimbursements.

How ClaimAid helped:

- Assisted with the Medicaid enrollment and re-enrollment process
- Billed Medicaid for eligible services
- Provided all training for the assigned staff
- Provided monthly and yearly detailed reports and invoices
- Built a web-based portal for staff documentation and data submission
- Provided audit reviews and assistance

## Results

The additional Medicaid reimbursement money that ClaimAid secured for the district equated to \$774 per student and \$18,165 per therapist. This not only enabled the school to maintain current staffing levels, but also to hire new therapists, cover certification costs and expand the scope of their Special Education offerings.

"I have been very pleased with the service my district has received from everyone at ClaimAid. They have proven to be knowledgeable, personable, and dependable."
